4. Each member's contribution:

Andrew Clarke

- Designed components and general page structure using external design tool (Penpot - similar to Figma)
- Implemented custom components (checkbox, text field, number field, email field)
- Minor adjustments to components implemented by other team members (radio, dropdown)

Lisa Korolyov

- Came up with survey questions
- Created html skeleton (all questions and basic html components but no css)
- Implemented custom radio selector component
- Added finishing touches to website (spacing, font sizing, webpage title, and made all components of the same type to have matching styles)
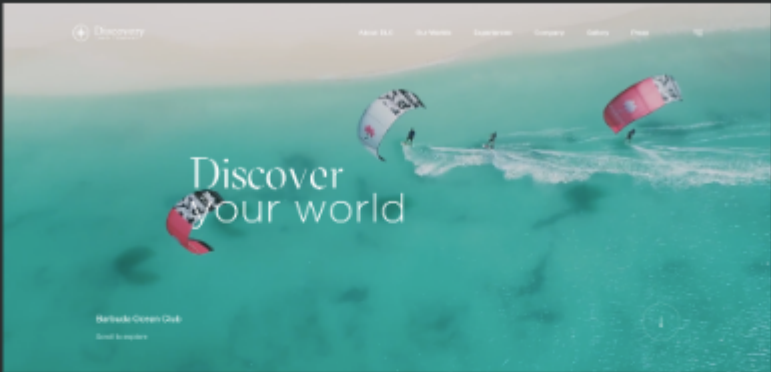

Zechen Zhou

- Set up the Github repository
- Hosted this lab on Github Pages
- Added README.md
- Designed dropdown menu component using Penpot
